Subject: Affidavit OK?

To the M-D experts:

Several weeks ago I sent to you this EOPSS draft affidavit to support a motion for a substitute chemist (cocaine). Please let me know immediately if you have any critique/improvements to suggest; EOPSS will then prepare several similar documents for other drugs and I will ask John Grossman if he can give us an ETA for those.

The DPH lab director is now receiving summonses for long-retired/moved chemists; the DPH does not have the resources to produce these witnesses *or to retest the drugs*. Accordingly, it is imperative to get these affidavits posted on MDAA net ASAP to help all prosecutors litigate these cases.

Thanks.
